MOTION PLATFORM QS-220

QS-220 patent pending technology of linear actuators allows to develop highly realistic applications with detailed motion textures, velocity, suspension interaction feedback, engine vibrations, tactile feedback, haptic system and vehicle dynamics.

Innovative technology, modular and compact design, as well as the quiet operation makes the QS-220 a perfect motion base not only for professional applications but also for home users in various types of cockpits. Additional sets of QS-220 can be configured as a 4 and 6 actuated system to provide 3 / 4 / 5 / 6 DOF using dedicated cockpits from Qubic System product line.
